1.0 Introduction

Call Logger is BlackBerry® applications which will journal your calls to your calendar, including the ability to add categories to phone calls with our BBProductivity Outlook Connector.

2.0 System requirements

Call Logger requires BlackBerry OS 4.1 or greater. And provides support for the Perl and Curve.

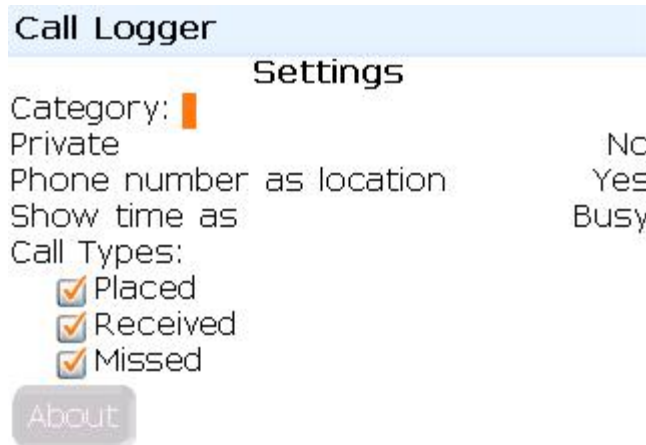

3.0 Installation

Call Logger may be installed via Desktop Manager or Over-the-air through our web site. Please visit <http://www.bbproductivity.com> for our OTA link. If installing via desktop manager:

1. Unzip downloaded file to your computer.
2. Attach BlackBerry to computer.
3. Open desktop manager and select application loader.
4. Click add, and browser to the unzipped folder and select the file CallLogger.alx
5. This all add the application "Call Logger" to your device.
6. Click next and finish the installation process.

4.0 First Use

Before you use Call Logger you should first set up the application. To do so, browse on your device to the to the Call Logger application and open it.

4.1 Options

If you would like to have your calls logged with a category please select a category, by highlighting the category filed, pressing the menu button and selecting a category. The category list is prorogated from your task list. Adding categories to call entries is only supported when

synchronizing with Microsoft Outlook®. To enable categorization you will need to install the BBProductivity Outlook Connector toolbar within Outlook®. See your downloaded ZIP folder or www.BBProductivity.com to download and read about BBProductivity Outlook Connector.

- The private option will set the appointment as private (yes) or not (no).
- Phone number as location will place the phone number of the caller in the location field (yes), no phone number (no), or place the phone number in the body of the appointment (in notes). Note, if you have the contact in your address book the subject of the appointment will contain the callers name.
- Show time as, will set what type of calendar entry will be made. (busy, free, out of office, tentative).
- Call types, check boxes will indicate what type of calls to log.

Once you have set your settings we recommend you press escape to leave the program and save your settings.

4.2 Operations

Once your settings are set, the application will now run silently in the background, and will log calls after they occur.
